Website: https://theweeklychallenge.org

Inspiration ...

- CPAN Pull Request Challenge (2015 2018) by Neil Bowers.
- Pull Request Club (2019) by Kivanc Yazan.

The beginning ...

- ◆ 25th March 2019
- Started as Perl Weekly Challenge
- Later it became The Weekly Challenge to accommodate Perl and Raku
- We started with domain perlweeklychallenge.org but then it changed to theweeklychallenge.org later.
- We still own the old domain, it just redirects the traffic to the new domain.

Format ...

- We started with two weekly tasks, one beginner level and other expert level.
- Later we added optional task where we asked for Perl interface to a given API.
- Joelle Maslak was the most active contributor to the API task specially and shared lots of interesting code.
- Also Neil Bowers who created Perl interface to the DetectLanguage API. And later got it listed on the official home page as primary Perl interface to the API

Contributors ...

- There are two categories, Regular Contributors and Guest Contributors.
- Regular Contributors are those who shares solutions in Perl and/or Raku only.
- Guest Contributors are those who shares solutions in all other languages.

Team PWC

◆ As of today, 13th July 2023, we have 290 regular contributors and 17 guest contributors.

Champions ...

- In July 2019, around 3 months after the launch, we started declaring champions weekly and offered prize money 50 US dollars, thanks to the generous sponsor Pete Sergeant of PerlCareers.
- We continued with weekly champions till Dec 2019. After that
 we changed it to monthly champions. We are still continuing
 with the format till date, again thanks to Pete Sergeant.
- Ideally we would want to go back to weekly champion format if we could find another sponsor.
- brian d foy has been a big support and even gave FREE books to our members.
- Please check out all champions so far: https://theweeklychallenge.org/champions/

Perl / Raku Contributions

- Perl (11483)
- Raku (6612)
- ◆ Blogs (3732)

Guest Languages ...

As of today, 13th July 2023, we have received solutions in 100+ unique guest languages.

TOP 10 Guest Languages

- Python (1641)
- Haskell (563)
- Ruby (538)
- ◆ Lua (483)
- ◆ C (429)
- Rust (391)
- ◆ C++ (385)
- ◆ BQN (299)
- ◆ Go (258)
- Java (238)

Star Contributors ...

- ◆ In the Team PWC, we have members with varied level of experience.
- Unofficially, Damian Conway, participated in the weekly challenge between May 2019 and September 2019. His contributions are compiled here for your reference:

https://theweeklychallenge.org/blog/damian-corner

Continued...

- Similarly, Andrew Shitov, got his Raku contributions listed for all Raku fans: https://andrewshitov.com/raku-challenges-index/
- We even had Abigail/Neil Bowers/Dave Cross for sometimes in the team. All the weekly contributions can be found here:
 - https://theweeklychallenge.org/recaps/

YouTube Channel

I used to take part in the weekly challenge earlier and even created a YouTube channel to demonstrate my contributions. You can checkout here:

https://www.youtube.com/c/mohammadsajidanwar

Reviews ...

- We are lucky to have great reviewers both for Perl and Raku.
- Andrew Shitov introduced new style of review for Raku using live video.
- Perl Reviews: https://theweeklychallenge.org/p5-reviews
- Raku Reviews: https://theweeklychallenge.org/p6-reviews

Infrastructure ...

- The website is running as GitHub pages and hosted by GitHub.
- The code base is Hugo using FREE theme.

Future Plan ...

- To host the website on a proper platform like Digital Ocean.
- Build the website using pure Perl and web framework like Dancer2.
- Allow easy search the code base on website.
- Have proper database to hold user data securely.
- Look for more sponsors to make the challenge more fun and attractive.
